

## Little Big Horn College Library

Location

Billings, MT

New 24,000 square foot building consisting of a 13,000 square foot wood framed library and a 2 story 11,000 square foot structural steel archives and administrative building.

The library is one of the most complex wood framed buildings you will find, consisting of 30 log columns and 78 glue-lam beams, which create a compound radius roof line. One of the unique challenges of this building is bringing the two different building structures together.
