

Pre-Engineered Metal Building

Ultimate Space Storage Condominiums

Location

Billings, MT

This project is has four separate pre-engineered metal buildings provide by VP Buildings on a 3 acre site. Each building is divided into 8 to 14 garage units ranging in sizes form 16x24 to 24x24. Each unit has its own electrical service panel and unit heater as well as an overhead garage door with a security key pad access control.

One the end of building one is a completely furnished club house with kitchenette, bathrooms, shower, and small storage area for equipment commonly used by unit owners. The site also has a RV dump station and water well to service all units and club house.
