

United Blood Services

Location

Billings, MT

This project included demolition of an existing store/warehouse constructed of heavy timbers and wood decking. 200+ timbers were salvaged and approximately 80% of the wood decking was also. Although not reused in this project those salvaged items were reused for other projects.

Part of the existing foundation was evaluated and determined to be of sufficient strength to support the new construction. Cost savings to the project to reuse the foundation was in excess of \$60,000.00
